LIBERATOR FROM TEXAS

The U. S. Army Air Forces' B-24 bomber from the new $22,000,000 plant of the Consolidated Aircraft Corporation at Fort Worth. Named the "Liberator" by the R. A. F., it is a four-engine, high wing, all-metal monoplane incorporating the new high-speed Davis airfoil. With armor plating, self-sealing fuel tanks, a top speed of over 335 m. p. h., a range of 3,000 miles, a bomb capacity of about four tons, and bristling with guns, it is the world's most efficient long range heavy bombing plane.
